### 3 Korean news

#### 3.1 HanPure KVIE, signed MOU with DINZ

HanPure KVIE (Korean Velvet Import and Export) and Deer Industry New Zealand signed a memorandum of understanding on September 26. The signing ceremony was attended by Chung Choong-mook, CEO of Hanpure's Korean deer import and export corporation, Innes Moffat, chairman of the New Zealand Deer Association, and Rhys Griffiths market manager.

A hands-on tour of the GMP plant was given to officials from the DINZ, and the two organisations discussed cooperation and development.

Hanpure, the largest velvet import, manufacturing and distribution company in Korea, has signed an agreement with the DINZ to promote deer velvet's quality and health benefits.

Dailian, 2022-10-04<sup>3</sup>

#### 3.2 Kwangdong is almost at the end of development of prostate health functional food using deer velvet

Kwangdong Pharmaceutical has entered the final stage of developing prostate health functional food materials using deer velvet. The company completed a human test at Catholic University of Korea's Seoul St. Mary's Hospital and St. Vincent's Hospital to evaluate "deer velvet complex extracts" on prostate health. Kwangdong Pharmaceutical has conducted a human body application test to obtain its own individual certified functional ingredients.

The total sales of prostate health functional foods in Korea is expected to increase 49.5% in a year from KRW 20 billion in 2019 to KRW 29.9 billion by 2020.

### 3.3 KGC strengthens the 'Cheonnok' brand...Also review products for children

KGC, Korea Ginseng Corporation subdividing its target by gender and age the "Cheonnok" product line, a deer velvet brand. The company recently launched a human body application test to check the effect of velvet on children's growth. Chennok has recently strengthened its brand by launching products that subdivide its product target group. As of the first quarter of this year, 88.9% of the company's total sales are red ginseng products. This is still a high proportion, but it fell 0.6 percentage points compared to the same period last year.

CEO Score Daily, 2022-06-29<sup>5</sup>

### 3.4 Safety management of imported herbal medicines - A journal by Dr. SeungHoon Lee

As an OMD who only treats patients mainly, it is difficult to know about the deer velvet's supply chain regarding the country of origin and how they are distributed etc. Mainly rely on word-of-mouth from doctors around you OR use it for patients for a long time and learn from the experience.

In addition, the fact that there is no standard for the indicator substance of deer velvet is also difficult to choose.

There are pros and cons of New Zealand deer antlers and Russian. Russian processors dry velvets by natural winds for a long time. Considering the difference in tissue density and adhesion, it can be seen that the bony and relative areas have higher water-soluble components.

Luckily I had chance to visit several deer farm in Ust-Koksa, Russia for about a week with help of 'Y' trading company. "The colour is definitely different!" I unwittingly exclaimed when I saw the deer velvet's cut being dried on the Kayakina farm. After returning to Korea, I cut the Russian velvets right in front of me with the CEO of another Russian velvet company, so it looked great too over all parts - upper, mid and tips. Tips are better than New Zealand's - more clear and dense.

Importers and distributors are an important part of the traditional medicine sector, and I think these companies have an obligation to strive for the trust and development of patients.

### 3.5 Carbon emissions verification mark on Korean beef

Cho Kwang-tae is head of the Jeonbuk Korean Beef Breeding Cooperative. "Meat with this 'low carbon verification' mark has carbon emissions per kilogram only one-third of the world average," he says. This low-carbon verification was made possible through the world's first quantitative analysis method of carbon footprints by Professor Lee Hak-kyo. Eating 1kg of certified Korean beef instead of foreign beef will reduce carbon, such as planting two 30-year-old pine trees. Professor Lee made a reference in a form of a map by analyzing which genes in cows help reduce carbon in the future. By repeating this work, it is improved so that genes with low carbon emissions can be continuously delivered to future generations.

### **3.7 \$240,000 exports of deer velvet products to Vietnam from Chungcheongbuk-do**

Exports of "Mom-en-Yong (Deer velvet for Body)" a deer velvet brand of ChungcheongBuk-do Province (Governor Kim Young-hwan), which had been suspended due to COVID-19, will resume.

The export will be carried out through a contract between Mom-en-Yong Bio, which was supported by the provincial strategic food development project, and "YHL," a Vietnamese distributor. The shipment is worth \$70,000 for the first contract and will be sold at 15 stores of YHL in Vietnam.

As the demand for health and immunity in Vietnam increases rapidly, the province is expected to expand its exports of deer velvet of Korea, continue to be popular in Vietnam. Earlier, a small amount of exports were made to China, Vietnam, and Taiwan over the past three years.

Meanwhile, the Mom-en-yong Bio Agricultural Company will continue to make efforts to improve the quality and secure safety of domestic deer velvet products such as GMP, HACCP certification and governor quality certification.

### 4.2 HY (a.k.a Korea Yakult)

#### 4.2.1 Balhyo NokyongCheongo

- Packaging and price: KRW400,000 for 1 box (12g x 60 pouches)
- Major ingredients: Red ginseng, herbs, and fermented deer velvet from New Zealand

In addition to deer velvet, the new product is designed to contain various auxiliary ingredients to help recharge and replenish energy. It is in the form of a thick concentrate made of carefully selected 12 ingredients such as 6-year-old red ginseng, steamed Rehmannia glutinosa, Japanese cornel fruits, Yams and ginseng.

Nokyongcheongo is a good gift with a total of 60 bags per month in a luxurious package. It is easy to carry and eat by wrapping individually with individual sticks.

In commemoration of the launch of Nokyongcheongo, HY will hold an event to provide up to 30% discount and a "valuation golden card" worth 1 dollar of pure gold as prizes.

You can purchase the product through the online mall, Fredit ([fredit.co.kr](https://fredit.co.kr)) and

<sup>10</sup> <https://dailian.co.kr/news/view/1161818/>

HY's Fresh Manager. It can be delivered on a designated date, so it is delivered free of charge on the desired date when ordering.

#### 4.2.2 Balhyo NokyongCheon Dual Jin

- Packaging and price: KRW5,000 for 1 bottle (80ml)
- Major ingredients: Red ginseng, herbs, and fermented deer velvet from New Zealand

HY announced upcoming release of 'NokyongCheon Dual Jin'.

The lid contains fermented deer velvet capsule, and the container contains liquid fermented red ginseng. You can eat it anywhere without water.

Fermented deer velvet and fermented red ginseng, the main ingredients, were applied with materials developed by HY. Fermented velvet was fermented with the HY7602 strain of New Zealand deer velvet. The company explained that this increased the content of sialic acid, an active ingredient in deer velvet, and that HY's Central Research Institute commercialized it after five years of research.

Fermented red ginseng is the hero ingredient of HY's health food made by fermenting 6-year-old red ginseng from Korea with Bifidus bacteria. Vitamin B1, manganese, and 17 traditional auxiliary ingredients are added to this.

Nokyongcheon Dualjin is a subscription-type product. If you set the delivery date and delivery cycle, the HY's Fresh Manager delivers it free of charge.

#### 4.3.3 Re-released "Madame JeongKyung" with deer velvet and pomegranates

- Packaging and price: KRW180,000 for 1 box (50ml x 30 pouches)
- Major ingredients: Red ginseng, herbs, and deer velvet from Russia

Gujeon Deer Velvet made of Russian deer velvet announced that they will re-launch "Gujeon Deer Velvet - Madame JeongKyung" on the 11<sup>th</sup>. product that is prepared with Turkish pomegranate concentrate as the main ingredient in high-quality deer antlers. In addition, 14 domestic ingredients such as red ginseng, mugwort sulfur, angelica, jujube, and acid medicine were also included. An official from Gujeon Nok-yong said, "If you look at the screen of the Ten Longevity Symbols at Gyotaejeon Hall in Gyeongbokgung Palace, known as the residence of the queen during the Joseon Dynasty, it has been considered precious since ancient times to find pomegranate trees and deer images." He added, "We re-launched it as a high-quality product after a renewal period as a product that has been loved a lot since its launch two years ago."
