2 Korean news

2.1 Kwangdong's registered HFF ingredients for prostate

Kwangdong Pharmaceutical's "composite extract of deer velvet and angelica gigas root etc." was approved by the Ministry of Food and Drug Safety as an individually recognized functional ingredient (No. 2023-16) for the first time in Korea as a ingredient using deer velvet.

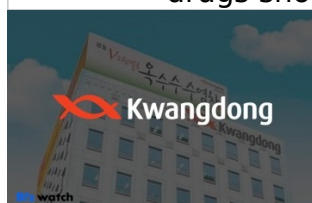

The **12-week human efficacy evaluation of 120 men with prostate symptoms** at St. Mary's Hospital and St. Vincent's Hospital showed **statistical improvements** in the total score and detailed evaluation items of **International Prostate Symptom Score (IPSS)**.

Koo Young-tae, director at Kwangdong, said, "We are promoting the discovery and development of natural materials integrated with food and medicines to secure core capabilities in the natural product business."

Health Functional Food's ingredients are divided into a notification type and an individual recognition type. Certain indicator ingredients and contents, such as vitamins and minerals, are determined by the Ministry of Food and Drug Safety, which is a high-quality type of ingredient that anyone can use. On the other hand, the individual recognition type refers to the newly discovered indicator component or functionality separately recognized through various data, and if registered as an individual recognition ingredient, **exclusive rights to the ingredient can be recognized in Korea for six years**.

MFDS's notice

- Ingredient name: Complex Extract of Cervus elaphus, Angelica gigas and Glycyrrhiza uralensis
- Recognition number: No. 2023-16 (2023.07.07)
- Company name: Kwangdong Co., Ltd
- Functionality of the ingredient : May help to maintain healthy prostate
- Daily intake amount: 500 to 1,000 mg/day as a composite extract
- Precautions for ingestion

2.3 Naju Jinseong Deer Farm

Yoon Mi-yeon, CEO of Naju Jinseong Deer Farm, won the grand prize at the "31st Excellent Deer Contest 2023" held in Yesan, Chungcheongnam-do. **The deer velvet weighed more than 20 kilograms with excellent appearance, such as the symmetry of the horns.**

The Excellent **Deer Contest** is held annually by the **Korea Deer Breeders Association** to discover deer of excellent lineage with high-quality deer velvet. This year, 81 animals were submitted from 46 farms across the country, competing in a total of 12 categories, including the grand prize, and a total of 12 awards were awarded KRW 18.5 million won.

In addition, Jung Hwan-dae, CEO of Gokseong Osan Deer Farm, won the grand prize in the deer weight category, and Lee Sang-hyun, CEO of Shinan Ilgu Deer Farm, won the Yangnok Newspaper Award, a special award.

According to the National Statistical Office, as of 2021, there were 89 deer farms in Jeollanam-do, and 2,383 deer were raised, accounting for 10% of the country (23,000).

Jeollanam-do plans to invest a total of 280 million won to improve the lineage of about 500 deer as a project to support artificial fertilization for deer

2.4 Gongjindan for fatigue

Traditional medicine prescribes Gongjindan to quickly and efficiently recover from chronic fatigue symptoms.

Among the components of Gongjindan, Musk(Moschus) promotes blocked blood circulation in the body, clears the mental, strengthens resistance to disease and heart, so it has the effect of cooling the head and inside and improving symptoms.

In Gongjindan, deer velvet do not simply put heat into the body, but **send the medicinal effects evenly to the body overall.**

It is expected that fatigue will be relieved immediately after taking it and the overall physical condition will be greatly improved, but the effect of musk diagnostic slowly appears. If you want to see significant medicinal effects, it is better to continue to bow down for more than three months.

Medi Sobija News, 2023-07-27⁴

2.5 Cheonnok reinforcing the 'life care line-up' for all with top tier deer velvet

KGC has established a life care line-up such as → Cheonnok Be-strong(Men's Stamina) → Cheonnok Returning(Women's recovery to daily-life) → Cheonnok Boosting(Test-taker physicality) → Cheonnok Growing(Growing kids) → Cheonnok Lively(Women's Life) → Cheonnok Energetic(Senior Energy).

KGC's Cheonnok (means "precious deer velvet from heaven") and is a premium deer brand created by combining traditional ingredients after carefully selecting only the antlers of healthy deer grown in NZ's clean environment. **Only 100% of the top tier SAT deer velvet, guaranteed by the NZ government is used.** The highest grade that meets difficult conditions such as the thickness of antlers, length of bone fragments, battery length, and weight is called the Super A Traditional (SAT).

In addition, the technical skills of KGC, which has eight patent technologies related to deer velvet, and eight stages of thorough raw material management standards (direct contract → production management → safety verification → quality verification → dry verification → dry verification inspection → selection → quality inspection) are added to create "Jeonggwanjang Cheonnok."

Cheonnok has increased consumer convenience with various formulations. Concentrated, in the form of a stick so that you can easily consume, a liquid pouch type.
