2 Korean news

2.1 DeeJ faces growth limits despite stock surge

- Single-product dependence: Dong'e Ejiao (DeeJ), China's top traditional medicine brand known for donkey gelatine, has enjoyed strong performance but faces challenges due to its heavy reliance on this one product. Past attempts to expand into deer velvet have failed.
- Competitive market, low barriers: The gelatin market is growing but highly competitive, with rivals offering lower prices. Dong'e Ejiao must find new product growth outside of donkey gelatine to stay ahead.
- Strong stock, but for how long?: **While many Chinese herbal medicine stocks have dropped, Dong'e Ejiao's has surged by over 75% since 2021.** Supportive government policies and high dividends are helping for now, but its future hinges on investment in R&D and product diversification.

China's Gelatin Market on Steady Rise (2019-2024).

The chart shows that China's ejiao (donkey-hide gelatin) market has grown consistently from 2019 to 2024. Market size increased each year, reaching an estimated **860 billion yuan in 2024**. Although growth slowed in 2023, it is expected to rebound in 2024, with a year-on-year growth rate over 13%, the highest in this period.

2.2 Cardi B shares personal experience on KGC's 'everytime' product

Cardi B praised Jung Kwan Jang's "Everytime" red ginseng on TikTok, helping her energy levels after childbirth and turning 30. Her million-view video boosted US interest in red ginseng.

The company showcased benefits at the Natural Products Expo West 2025 and launched three new sports products (Power Form, Perform A, Calo Trim) **coming to Amazon soon**. KGC Ginseng Corp plans global growth by adapting products locally. Cardi B's Grammy-winner status makes her endorsement valuable. Red ginseng is known for boosting energy and immunity.

2.3 HanPure was invited as a NZ velvet importer for the KOIMA event

KOIMA held an event to welcome their new chairperson and hosted a **special exhibition of New Zealand products** including **New Zealand velvet display by HanPure**.

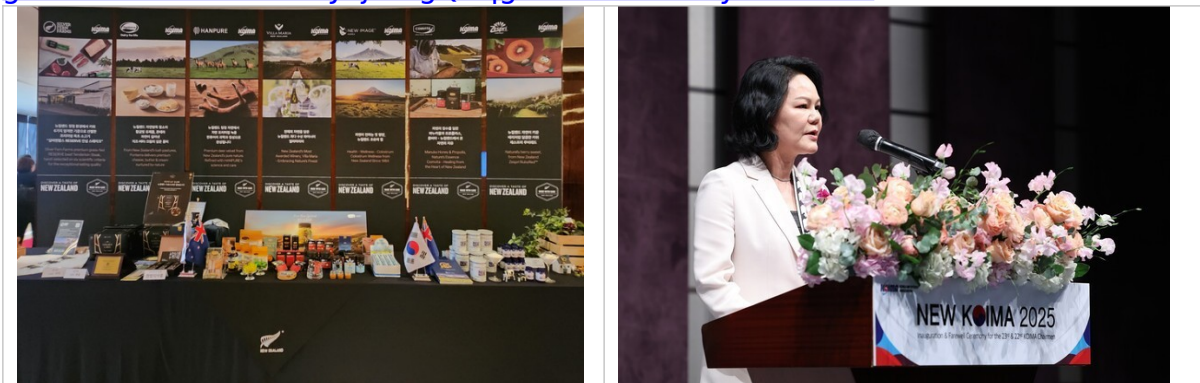

Yoon Young-mi, CEO of Highland Food, has been inaugurated as the new chairperson of the Korea Importers Association (KOIMA). At the ceremony in Seoul, she unveiled the "New KOIMA 2025" vision, emphasising that imports are just as vital as exports for national economic strength.

She plans to strengthen KOIMA's role as a "one-stop solution and network centre" to help foreign businesses enter Korea and support Korean companies facing import challenges. Her strategy includes promoting balanced trade, engaging import delegations in trade diplomacy, and expanding cooperation with government and industry bodies.

Yoon, a self-made CEO, built **Korea's top meat import company over 26 years**, now generating over 1 trillion won in sales.

JoongAng Economy, 2025-03-31³

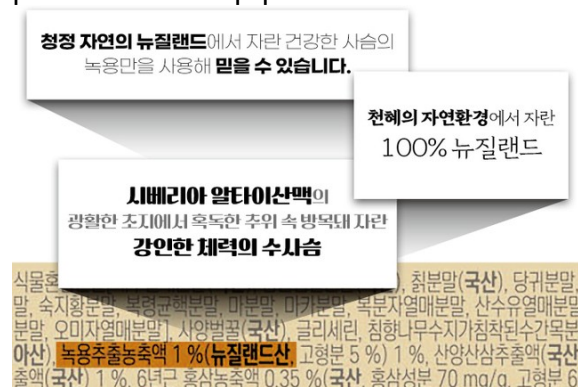

2.4 Concerns over home shopping deer velvet products in Korea

Most deer velvet products sold through major TV home shopping channels in Korea (such as CJ, GS, Lotte, Hyundai, and NS) use imported velvet, mainly from New Zealand and Russia, with no domestic Korean velvet used. The actual velvet content in these products was found to be very low—sometimes as little as 0.006 mL per 100 mL.

This is concerning about marketing practices that highlight New Zealand's "clean environment," potentially **leading consumers to believe that foreign velvet is superior to Korean velvet, despite the lack of scientific proof**. Korean deer industry groups worry this could harm the local industry and mislead consumers, especially since some well-known Korean medicine doctors endorse the products without clear scientific backing.

In terms of pricing, imported velvet products were not necessarily cheaper than domestic ones. In fact, despite the lower velvet content, home shopping products were often similar in price or more expensive than those using Korean velvet.

Korean deer industry experts warn that the low levels of velvet in these products could undermine consumer trust in deer velvet's effectiveness, especially given research suggesting that at least 2,000 mg per day is needed for real benefits. The Korean deer industry is urging consumers to support trustworthy domestic products to help protect local farmers.

Farmers News, 2025-04-18⁴

2.5 Hanpure's ongoing Korea-NZ collaboration on deer velvet research

A Korean delegation focused on the deer velvet industry recently held a second academic exchange meeting online with Dr Stephen Haines of AgResearch New Zealand. This follows their visit to New Zealand in November last year, where they explored local deer farming, production, and quality control practices.

³ <https://www.ioonganews.com/news/articleView.html?idxno=415258>

⁴ <https://www.nongmin.com/article/20250416500795>

The meeting covered advanced research topics such as the immune effects of raw velvet and its extracts, hormone impact, central nervous system response, anti-cancer potential, optimal extraction methods, and drug interaction concerns.

Discussions were based on the latest studies and academic papers.

Hanpure Co. Ltd, a Korean herbal pharmaceutical company and a key participant, has been maintaining regular academic exchanges with DINZ (Deer Industry New Zealand). They aim to bridge clinical practice and academic research and plan to continue sharing research findings with New Zealand partners. Hanpure stated that **these exchanges are helping to deepen scientific understanding of deer velvet, expanding its clinical applications, and strengthening ties between traditional Korean medicine and modern science.**

2.6 Korean ginseng brand sees rise in 50s-60s shoppers for family month

KGC Jung Kwan Jang has released a five-year sales analysis (2020-2024) showing **a sharp increase in purchases by customers in their 50s and 60s during May, known in Korea as “Family Month.” This group now makes up 64% of May sales, up significantly from 2020.**

The increase is linked to the 5060 generation often supporting both elderly parents and younger children or grandchildren. As people live longer and marry later, this group is increasingly responsible for multi-generational care.

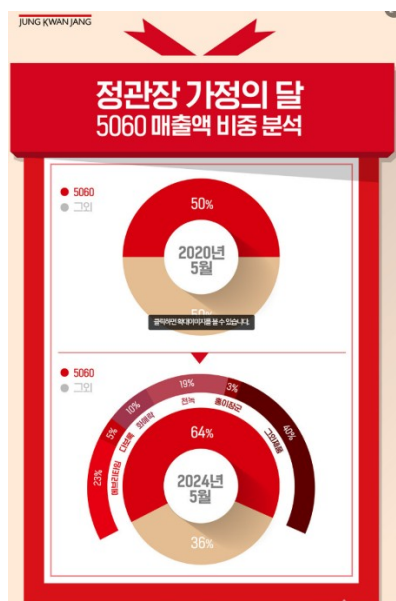

Popular products include

- Everytime (gift for children)
- **CheonNok** and Daborok (gifts for parents),
- Hongi Janggun (for grandchildren)

In the past five years, sales of these products to the **5060** age group have jumped notably—Everytime (+10%), Daborok (+14%), **Cheon Nok (+5%)**, and Hongi Janggun (+15%).

Jung Kwan Jang plans to continue diversifying its offerings to reflect changing health supplement needs and is currently running a Family Month campaign through 16 May, featuring gifts, giveaways, and promotions across its best-selling lines.

2.7 Korean herbal medicine gaining popularity in US clinics

Korean herbal medicines are steadily gaining traction in the United States, with a **Los Angeles-based importer, Baeksan Nokyeong Herb Trading Company**, leading the way. The company imports around **11 tonnes of Korean herbs annually, worth about USD 100,000, and supplies them to over 300 Korean medicine clinics across the U.S.** The importer's founder, Mr Lee Dae-young, attributes the growing demand to the unique aroma, proven efficacy, and reasonable pricing of Korean herbs.

Mr Lee began importing Siberian velvet antler in 1995 and later expanded to Korean herbal products in 2000 following encouragement from local practitioners. With support from the Korea Herbal Medicine Association and local experts, the company now imports over 400 herb products annually—100 of them Korean—including popular items like angelica root, astragalus, cnidium, and Korean peony.

2.8 Korean deer farmer rebuilds after devastating wildfire

A wildfire in March devastated several deer farms in Andong, with one farmer, Mr Han Young-guk, losing 35 deer and key facilities—causing about KRW 400 million in damage. He managed to save only a few animals, and survivors now show signs of stress, including deformed antlers.

Although some government support is available, Mr Han says it falls short of the true value of high-quality deer and only applies to new purchases. Despite the hardship, he has nearly finished rebuilding with his own funds and hopes to restart farming soon, inspired by the deer that survived.

2.9 Korean Deer Velvet Association lowers collection & purchasing fees for 2025

The Korean Deer Breeders Association has lowered fees for its 2025 deer velvet consignment and purchasing programme, following farmer feedback. Velvet will be graded into three categories, with **top-grade paid at 14,000 KRW per Nyang (37.5g) (about NZD 450 per kg)**. Antlers with defects or from farms with disease issues will not be accepted. The changes aim to support farm finances and improve operating conditions.

‘녹용수탁·수매사업 수수료 낮췄다’
사측협 ‘수매기준 완화...3등급 각관분지 3cm 이하’

3개 등급 나누고, 1등급 남당 1만4천원 지급

한국사슴협회(회장 이태관)는 2025년도 첫 녹용의 수탁·수매사업 수수료율 인하 조정을 하고, 회원들에게 신청을 독려했다.

한국사슴협회는 최근 SNS를 통해 2025년도 첫 녹용 대상 수탁·수매사업 안내를 공시했다.

수매기준은 각관분지 길이와 중량에 따라 3개 등급으로 조정하고, 가격은 최대 남당 1만4천원(1등급 기준)을 지급한다.

다만 3등급의 경우 ‘상대비율’이 높은 중량 4kg 이상 분지 길이 5cm 이내를 ‘상대비율’이 높은 중량 3kg 이상 분지 길이 5cm 이내로 조정했다.

수매조건으로는 녹용 외관에 분비물, 이물질 등 세척상태가 청결하고, 병동보관 상태가 양호해야 한다.

아울러 외관상 상처여부에 따른 불량 녹용과 특히 질병 발생은 협회 재정 지원에 따라 회원농가의 경영환경 개선 및 안정에 기여할 것으로 판단된다.

The Korea Deer Times, 2025-04-25

2.10 South Korea lists sika deer as harmful invasive species

The South Korean government has **officially designated the wild sika deer** (*Cervus nippon* also known as Formosan sambar deer) as a harmful invasive species under revisions to the Wildlife Protection Act, effective from April 28, 2025. Local governments may **now permit the hunting and culling** of these animals, which are believed to pose a threat to native ecosystems.

The decision follows data showing the population of sika has grown significantly over the past 40 years, raising environmental concerns. There are currently around 937 sika in the wild and over 170 in captivity.

The **Korean Deer Breeders Association has expressed concern about** the economic impact this decision may have on deer farms and related industries. They argue that sika farms could be restricted from breeding or relocating the animals, potentially damaging the viability of some operations.

2.11 Kwangdong launches premium deer velvet gift range for family month

To mark Family Month, Kwangdong has opened its Luxury Velvet Antler Hall (e-commerce sales page) and released five premium deer velvet products, highlighting the traditional Korean ingredient's benefits for energy, immunity, and circulation. The lineup includes liquid, stick, pill, and functional health food formats—designed for both daily convenience and high-end gifting.

Key products include:

- Kwangdong Nokyeong Sanghwang Liquid: A pouch-format tonic made from 16 traditional ingredients.
- Kwangdong Nokyeong Bogam Stick: A mild, easy-to-swallow powder in individually packed sticks.
- Kwangdong Nokyeong Bogam Pill and Gold Version: Traditional fermented pills, with the Gold version offering double the velvet content and premium packaging.
- Kwangdong Nokyeong Prostate: Korea's first velvet-based product approved for prostate health, aimed at middle-aged men.

To celebrate the launch, Kwangdong is offering discounts and free gift wrapping through its Memory365 platform. More details are available on the official website.

2.12 New Zealand Deer Industry Advisors Visit Korean Farm

On 30 April 2025, representatives from New Zealand's deer industry visited Unak Farm in Gapyeong, Gyeonggi Province, to observe deer farming practices and tour the breeding facilities.

⁹ <http://livesnews.com/news/article.html?no=50422>

The visitors, Brad Olsen and Millie Morgan, showed particular interest in the productivity challenges of sika deer farming and the farm's use of Total Mixed Ration (TMR) feed.

Farm representative Moon Dong-pyo explained that sika deer make up nearly 50% of the herd due to niche but royal market demand for their velvet, which is considered very valuable. Moon noted that TMR feed ensures balanced nutrition essential for deer health, helping to improve physical condition and velvet quality.

Brad Olsen is currently involved in government policy work in New Zealand, while Millie Morgan is a legal consultant specialising in agricultural regulations and policy development.

NZ 양록 관련 경영 자문위원 방한...운악농장 견학

사슴 사육환경 둘러보고...꽃사슴 TMR사료 관심 보여

좌측 사진 왼쪽부터 장종규 이사(레티튜 21), 문동표 대표, 밀리 모간(변호사), 브래드 올센(경영 컨설턴트).

4월30일 브래드 올센, 밀리 모간

뉴질랜드 양록위원회의 경영 자문 위원인 브래드 올센(Brad Olsen)과 밀리 모간(Millie Morgan)은 4월30일

경기도 가평 소재 운악사슴농장(대표 문동표)을 방문, 국내 사슴사육 환경을 견학했다. 경영학자이기도 한 브래드 올센은 뉴질랜드 내 대기업의

경영 컨설턴트로 활동하고 있으며, 밀리 모간은 변호사로써 농축산업과 기업 등에 법률 서비스를 제공하고 있다. 위원들은 농장 견학에서

생산성이 떨어지는 꽃사슴을 사육하는 이유와 TMR 사료에 깊은 관심을 가졌다. 이에 대해 문동표 대표는 "전통적 인식 때문이다"며 "꽃사슴 사육 두수가 전체의 50%에 육박할 수 있었던 이유는 아직까지도 꽃사슴 녹용에 대한 선호도가 높기 때문이다"고 설명했다.

문동표 대표는 또 "TMR 사료는 다양한 사료원을 혼합하여, 사슴에게 손쉽게 급여함으로써 영양 밸런스를 최적화할 수 있는 장점이 있다"고 덧붙였다.

The Korea Deer Times, 2025-05-10

2.13 BioDot has recently expanded its international presence

They successfully showcased their products, including their Han Dong Deer Velvet Research Institute brand, at the **Vietbaby HCMC 2025** fair in Vietnam and the **THAIFEX - Anuga Asia 2025** international food expo in Bangkok, Thailand. Two advertorial articles are features about it as below.

- BioDot's popular "Han Dong Kids Strong Deer Velvet Calcium Stick" for children prominently features New Zealand natural deer velvet extract.
- BioDot is actively targeting the fast-growing Southeast and Northeast Asian markets, particularly Vietnam (for kids and maternal health) and Thailand (broader health and pet care).
- Positive Buyer Reception: Their products, known for their functional benefits and natural origins, received significant interest from international buyers, leading to partnership discussions for customized product development and co-branding.
- Diverse Product Range: Beyond deer velvet, BioDot offers a range of health solutions for all ages, including pet health supplements, leveraging their 40 years of traditional Korean medicine research.
- Commitment to Quality: BioDot emphasizes its reliable manufacturing processes and commitment to natural, functional products, aiming to build strong, trusted partnerships globally.

2.14 Hanpure will be showcase on K-MEX 2025

Hanpure is a leading South Korean company specializing in the production and supply of quality traditional Korean herbal medicines, with a significant focus on deer velvet. **They are a primary supplier to approximately 50% of Korean traditional medicine clinics**, operating a GMP-certified factory that processes 35 tons of deer velvet and distributes over 600 tons of other herbs annually. Hanpure also runs "Hanpure Mall," a large online platform for practitioners, and is expanding its manufacturing capabilities with new facilities opened in 2025 and planned for 2026. Certified for good manufacturing practices, the company invests in R&D to advance extraction and application technologies for herbs, and aims to become a global Hanbang healthcare leader, leveraging events like K-MEX 2025 for international expansion.

News Dream, 2025-06-13¹²

2.15 Korea's velvet antler co-op begins 2025 domestic procurement

On 11 June, Korea Yangto Yangnok Nonghyup—the nation's only deer farming cooperative—launched its 2025 domestic velvet antler purchasing campaign. Under its trusted Nonghyup Anshim Nokyong brand, the **co-op plans to buy around 300,000 nyang (11.25 tons) of velvet nationwide through July**, using a strict 8-step quality control system.

The brand is known for using only Korean deer antlers, full traceability, and fair pricing. Chairman Ahn Hyun-gu reaffirmed the co-op's goal to set the standard for safe, high-quality Korean velvet in a market still dominated by imports.

Asia Economy, 2025-06-16¹³

2.16 Korean deer industry sees signs of recovery amid health boom

The Korean deer farming industry, once in steep decline, is **showing signs of recovery as health-conscious consumers drive renewed demand for velvet antler**. Numbers of farmers have cut back as much as they could. Imports from New Zealand and China had previously undercut local producers, but post-COVID interest in immunity and wellness has boosted domestic consumption and prices. The industry's market size grew from ₩261.7 billion (approx. NZD 327 million) in 2020 to ₩327.7 billion (approx. NZD 409 million) in 2023, with further growth expected.

Deer farming is also gaining attention as a sustainable, low-labour livestock option. However, challenges remain, including limited breeding cycles and continued competition from cheaper imports. Industry groups are calling for more government support and R&D to strengthen the position of Korean velvet.

Year	Number of Farms	Number of Deer
2001	12,564 farms	156,076 deer
2023	936 farms	19,428 deer
